Lee Johns Hopkins University, Baltimore, Maryland The interest in the glycoconjugates has risen. Two-dimensional GC-DCCC analysis of the glycoconjugates of monoterpenes, norisoprenoids, and shikimate-derived metabolites from Riesling wine. Over the past five years, the field of carbohydrates and glycoconjugates has been rediscovered by investigators in many disciplines. In immunology, specific. Lectin histochemistry was used to perform in situ characterization of the glycoconjugates present in boar testis and epididymis. Thirteen.
